<p>I purchased the Hinari MB280 The Genie Multi Attachment Blender to replace my juicer that was broken. It was delivered fast and was packaged well. I thought it was not particularly expensive for a juicer in my opinion. Regardless of information from what others have posted I believe it is a awesome juicer.</p>

<p>I purchased this for my auntie over Xmas. This must surely be the most complicated piece of kit it is just so fiddly to use and far too complicated. Just two marks from me I am sorry to say.</p>

<p>It works well and is a good simple juicer. But I think there are a few features that would make it a better juicer. Overall I have given the Hinari MB280 The Genie Multi Attachment Blender a six.</p>
